PRESS RELEASE

Aneric announces Spin-off of Software team and Start of Joint Venture with camLine to form a new company 'ANESOFT' in Singapore

After five years of successful cooperation on the Asian market Aneric Enterprise Pte Ltd (Aneric) and camLine Datensysteme GmbH have intensified their relationship by entering into a new Joint Venture company: ANESOFT Pte Ltd.

The ground breaking initiative will bundle both companies management, technical expertise, software engineers and support engineers to take advantage of the global marketing power of LineWorks Products. From now on ANESOFT will be responsible to distribute, deliver, enable and support LineWorks Products in the Asian market. Furthermore ANESOFT software engineers will also closely cooperate with the camLine LineWorks development team to achieve shorter time-to-market time periods for our customers.

Aneric and camLine executives said in a joint statement that ANESOFT will provide both companies with a stronger operating base in Asia in the fast-growing market for LineWorks Products. This new cooperation will help to improve support for existing and new customers and reduce time to market for software extensions, adaptations and new products. Both companies are very pleased with the success of their business in the past and are looking forward to further develop their business with LineWorks Products in the Asian market.

About Aneric Enterprise Pte Ltd

Aneric Enterprise was first established in late 1989. Aneric is focused on developing a dynamically growing partnership for our customers, employees, suppliers and the semi-conductor community. Our utmost aim is to offer reliable technical support to meet the demanding customer needs in the semiconductor industry. Our philosophy is to provide total quality solutions to both local and regional semi-conductor companies. We strive to always deliver the best competitive solutions to our customers.
